INTERNATIONAL SEARCH REPORT

International application No.
PCT/IN 2004/000233

Continuation of first sheet

1. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, the international search was carried out on the basis of:

Claims Nos.: 1-8 because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:

Since the term "pseudohydrate" is not defined in chemistry, it remains totally unclear which compound is claimed in claim 6 and in claims 7 and 8, which both refer to claim 6. Further since it is unclear which compound is defined by the term "pseudohydrate" the process of claim 1 (and referring claims 2-5) remains unclear, as well.
